

Sensormatic® Hand-held Super Detacher AM detacher

The Sensormatic® Hand-held Super Detacher
efficiently detaches the AM SuperTags
affixed to merchandise

Sensormatic® Hand-held Super Detacher

AM detacher

The Sensormatic® Hand-held Super Detacher is engineered to facilitate the effortless removal of SuperTags at the point-of-sale. Its lightweight design ensures ergonomic comfort, making it a user-friendly solution for staff. The detacher features a top-mounted tag insert, enabling ambidextrous operation with ease.

To safeguard against potential theft of the detacher itself, it is equipped with an EAS element. This element triggers the store's detection panel systems if an attempt is made to remove the detacher from the premises, adding an extra layer of security.

Benefits:

- Shrinkage reduction
- Designed for the effortless removal of Sensormatic® Supertags
- Lightweight, comfortable, and ergonomic design ensures ease of use
- Rugged construction ensures durability for day-to-day use
- Operates without the need for electric power, offering flexibility in placement and use
- Can be easily operated with either hand, enhancing user convenience
- Features a lanyard to prevent unauthorized removal or theft of the detacher
- And much more!

Applications:

- Loss prevention at retail stores

Sensormatic® Hand-held Super Detacher
