

RF Satellite Tag

RF tag

The RF 2 MHz Mini Satellite Tag is a circular anti-theft security tag based on RF technology. It's lightweight, durable, and deterrent. Typically used with a conical head pin, it's often found on coats, sweaters, and pants. It can also be used with a single or double loop lanyard pin to protect shoes, handbags, certain sports equipment, or any other merchandise that can't be pierced by a pin.

Benefits:

- Shrinkage reduction
- Employs advanced radio-frequency RF 2 Mhz technology for superior performance
- Compatible with all RF 2 Mhz equipment, offering versatile use
- Designed with distinctive lines that serve as a potent visual deterrent
- Each tag is supplied with a metal pin for immediate application
- Exhibits a sleek light grey color, blending seamlessly with a variety of product aesthetics
- And much more!

Applications:

- Loss prevention at retail stores
