

Integrated Lanyard RF Tag

RF tag

The Integrated Lanyard RF Tag is a versatile security solution designed to secure items with irregular shapes or handles where a traditional pin cannot be used. Ideal for a wide range of products including luggage, handbags, select sporting goods, and various hardware tools and equipment, this tag provides the same high-performance anti-theft protection as the standard RF Mini-Black.

Enhancing its application flexibility, this version comes equipped with a robust 100mm lanyard. The tag operates on an integrated RF frequency and is presented in a sleek, all-black design, inclusive of a matching lanyard, for a seamless aesthetic. For added security, the tag features a Super Lock structure.

Benefits:

- Shrinkage reduction
- Incorporates a robust clamping mechanism to enhance resistance against unauthorized removal
- Designed for items with handles or irregular shapes such as luggage, handbags, certain sporting goods, and various hardware tools and equipment
- Compatible with all AM 8.2 Mhz equipment, offering versatile use
- Designed with distinctive lines that serve as a potent visual deterrent
- Equipped with a Super Lock structure for additional security
- Exhibits a sleek black color, blending seamlessly with a variety of product aesthetics
- And much more!

Applications:

- Loss prevention at retail stores

Integrated Lanyard RF Tag
