

Solo Plus™ AM AM security detection system

Solo Plus™ AM system reduces unauthorized removal of products by detecting the AM tags in any direction

Solo Plus™ AM

AM security detection system

The **AM Solo Plus™** anti-theft antenna allows for wide entry spaces while maintaining a sleek, lightweight aesthetic.

Its **exclusive injected ABS design** (grey or black) fits perfectly into any commercial environment.

It reduces implementation costs for projects requiring a large protection perimeter or wide traffic areas.

Ideal for hardware stores, supermarkets, and large retail outlets.

The **Dual Fly** technology ensures synchronization between antennas, improving tag resonance and increasing detection in all tag orientations.

The **AutoScan** function allows automatic visualization and synchronization of surrounding antennas' activity to guarantee optimal efficiency.

Customization

Optional customization is available with brand advertising printed on paper media and integrated to the antenna. This option allows you to promote advertising campaigns or strengthen your branding directly on the system.

Remote System Management

Thanks to the EASi intelligent system, the AM Solo Plus™ is fully connected (IoT). → Remote monitoring and adjustment via software help reduce maintenance costs and downtime.

Installation

To ensure optimal performance and safety, installation by a certified professional is required.

Benefits:

- Reduces shoplifting losses
- Grey or black injected ABS design, lightweight and stylish
- Reliable detection up to 2.40 m between antennas (depending on configuration and tags)
- Grey or black injected ABS design, lightweight and stylish
- Reduced backfield thanks to transceiver or emitter/receiver mode
- Automatic synchronization via AutoScan technology
- IoT (EASi) connectivity: remote access, data collection, integration with other technologies
- All-position detection using dual-loop antennas (vertical/horizontal)
- Simplified installation and maintenance, reducing operating costs
- And much more!

Applications:

- Loss prevention in retail stores

Gateway EAS Solution

Manufactured / developed by Inwave Technologies

Distributed by APTQ in Canada

Solo Plus™ AM

System Design

Solo Plus™ AM

Specifications

Features

Advanced noise reduction algorithms	●	RGB lighting	●
Automatic synchronization (AutoScan)	●	Programmable sound and light alerts	●
Emitter/receiver or transceiver mode	●	Internet access	○
Grey or black injected ABS design	●	IoT Connectivity (EASi)	○
System status indicator	●	Shielded bag detection	○
Dual-loop antenna (vertical/horizontal)	●	Integration with other technologies	○
Available in grey or black	●	Extended connectivity	●

● Included ○ Optional

Detection range

Hard tags Up to 2,4 m

Technical specs

Category	Brand new
Width	400 mm
Height	1640 mm
Depth	120 mm
Advertising dimensions	Total paper size: 350 × 1325 mm Viewable area: 320 × 1290 mm Safety margin: 300 × 1270 mm
Weight	4,5 kg
Power	120 V (power cable included)
Operating temperature	Up to 50 °C / 122 °F

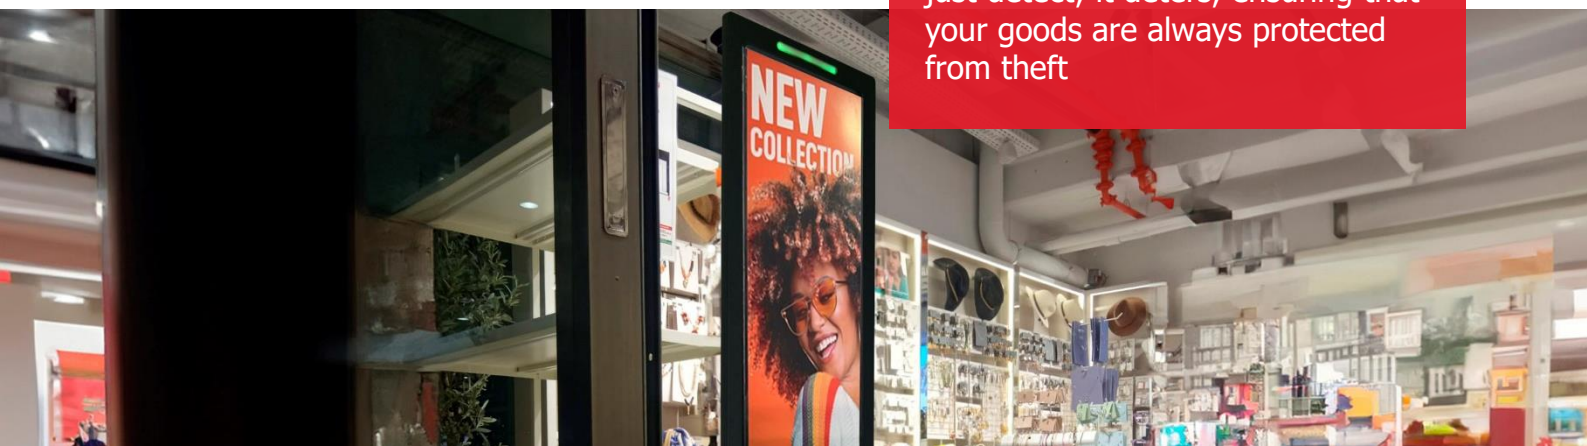

AM Specification

Operating frequency	58 kHz
Technology	Dual-loop vertical/horizontal antenna, emitter/receiver or transceiver
Supported tags	All 58 kHz labels that comply with international standards

Product reference

SKU AM-SPL-N

The Solo Plus™ AM system doesn't just detect; it deters, ensuring that your goods are always protected from theft

With over 25 years of experience, APTQ specializes in electronic systems in Canada. Our team offers a range of quality products for loss prevention, inventory management, and cross-selling. We provide the best technologies available on the market, combined with our recognized expertise in the field, to ensure an optimal experience in every respect.
